

Monorock Multifix

Rigid panel of single-density stone wool with a fleece on one of its faces that helps to weld the waterproofing asphalt sheets.

Application

Thermal and acoustic insulation for medium-low maintenance light metal roofs. Roofs finished with bituminous or synthetic waterproofing sheets fixed by welding to thermal insulation.

Advantages

- The standard solution for medium-low maintenance roofs.
- Excellent support for a finish with both asphalt and synthetic sheets.
- Non-combustible panel that helps to prevent the spread of a fire.
- Great improvement in the acoustic insulation of the constructive solution and great acoustic absorption capacity on perforated metal sheets.
- Thermal and dimensional stability.
- Ease and speed of installation.
